

## Cat Claw Covers Is A Must Have

As cat owners we want the best for our pet. We make sure that everything is taken care of from the food to hygiene. As much as we want our cats to avoid scratching the household furniture and other stuff like carpets, doormats, rag; it still happens and it becomes an unavoidable situation.

Scratching and clawing is a necessity for them. It is a part of who they are and they can't go on without. Having these claws is a defense mechanism they have so that they can protect themselves from traps in the home or outside the home. It is part of their innate nature. Yet even though we know this is true, they are still able to destroy things in our home.

People have suggested that we should declaw our cats. However, this is not a good idea because it will hurt them. It should not even be part of the options that we are considering.

So since there is such a need for alternatives on how to handle scratching of furniture. Many companies have tried to come up with different solutions that may just solve the problem at hand. For all the cat lovers out there, you and your cat can be happier because there is a solution.

So what is the solution? It is Nail caps that function as cat claw covers. This definitely benefits both you and your cat. You will be happy because your home furniture will be protected from your cat's claws, and your cat will be happy because he won't need to feel the pain of being declawed.

Even though these caps cover the claw, it will still give your cat the ability to use their claws. Putting them on your cat is also easy and safe. The covers can be applied to the front and rear claws of your cat, and they will not feel uncomfortable.

There are different sizes when it comes to the claw covers. The size will depend on the age and size of the cat. Kitten claw covers, small, medium, and large claw covers are available. It is very easy to apply them on your cat.

First thing to do is to trim the claws of the cat. If your cat is still a kitten, then you won't need to trim them. Fill the cap with adhesive until its fill 1/3 of the way. You can then put the nail of your cat inside the cap; hold on to your cat for a minute or so, and then you are done.

So if you want you and your cat to be happy, then enjoy the benefits of the cat claw cover.
