

Boston Terrier Training Made Easy

Without questions, Boston terriers are a very popular breed of dog. For all their popularity however, Boston terrier training can be somewhat difficult. It takes a lot of time and a time of patience. If you have one of these terriers, you may be afraid that training him is an exercise in futility. That is not the case at all. You just need to follow a few techniques which will help you avoid some mistakes.

One of the biggest misconceptions that people make when it comes to training their Boston terrier is the time frame. A lot of people think that it is going to take upwards of six months before they see any type of results from their training. The first thing you need to do is get that number out of your head, you will begin to see results right away if you know what you are doing!

Another misconception held by terrier owners is the use of aggression. That will make your dog scared of you but it will not make him respect you. Moreover, it can actually backfire and be extremely ineffective. You do not need to bully your dog to make him submit. If you try that, he will never come to have any trust in you.

On the flip side, if you treat your dog like you treat your best friend, you are not going to get anywhere with it. This is something that a lot of dog owners have a lot of problems with. While you want to nurture and treat your dog with respect, you are still the dog's owner and you need to make sure that they know that you are, in fact, an authority figure.

If you want all of your training to go really smoothly for your dog, there are quite a few tips and tricks that you are going to need to follow. First, you do not want to teach your Boston terrier too many things at once. You want to concentrate on one trick or command and once they have mastered that one, move onto another one.

Next, you definitely want to make sure that you do not make the training last extremely long. Just a quick fifteen or thirty minutes and you should be done. Your dog will get extremely bored if you make your training sessions last for hours and hours.

Finally, you want to make sure that it is fun for your dog. Having a boring training session will honestly make your dog tune you out completely. You want to make sure that you keep your dog energetic and having fun.

Clearly, there are a lot of things to consider when it comes to teaching your Boston terrier. If you follow these tips and techniques, you will be amazed at the results. Your dog will be attentive, he will behave well, and he will have impeccable manners for a pooch.
