

## The Bark Dog Collar: How It Works

Excessive dog barking can cause a hassle and annoyance for more than just you. If you have neighbors nearby they can probably hear your dog barking or howling all night too and this is just not fair. As a dog owner it is your responsibility to ensure your dog is at least trained well enough that they will not be barking incessantly at all times of the day and night.

Dogs will always bark to express whatever sensations they have, but even so, there are a few things that you can do to restrain his barking. If you don't want to spend a lot of money, or don't have the time for every day training, then a bark dog collar is probably your best choice.

### Your Options

If you are interested in purchasing a bark dog collar, first you will need to make up your mind on which one you want. There is the shock dog collar for one, which is certainly the most intense. This collar uses an electric shock that actually shocks your dog when they bark. Although it is not supposed to be all that painful, for most owners even the idea of using some form of pain to train their dog is unthinkable.

If this is your case, then you can try a method that seems less harsher, like the citronella anti bark collar. The principle of the citronella collar is the same as the principle of the shock collar, only that instead of electrical shocks, this collar uses a small spray of citronella smell. This spray is totally harmless, and stops barking by making the dog stop and wonder what it's happening.

The smell is very strong, and dogs will try to figure out where it's coming from. Dogs are intelligent animals, and they eventually will realize the connection between the barking and the citronella spray, and will refrain from barking without a good reason when wearing the collar. Of course, the collar isn't meant to completely eliminate the dog's natural way of expression, which is why all models have a switch that allows you to turn it off to give your dog a rest or to let him be free to bark at intruders and strangers that break into your house.

Their instinct is to bark when they hear something and once they give out that first bark if they hear something around the house, they will see that no spray came out of the anti bark dog collar and will feel comfortable to continue barking to alert you.

If you don't have the time for training and don't want to spend a lot of money on a dog school, then the bark dog collar is the best option that you have.
